

Shell Scheme Info and Extras

Please use the 1 Square = 1m grid below, in conjunction with your exhibitor order form to indicate the extras you require. Please give the position and heights of shelves and wire racks etc. Please note wire racks **CANNOT** be positioned into corners of stands

Panels

Panels are covered in fire retardent grey material which accepts Velcro fixings. Under no circumstances must anything be nailed, screwed or glued to the shell scheme panels or metalwork of the stand. All damage will be charged to the exhibitor at full replacement cost. Panels are attached to each other by aluminium uprights which stand 20mm proud. Graphics can be attached to stands direct with Velcro (maximum width between uprights is 945mm). Exhibitors with larger graphics should contact **Index** for advice.

Space Only Sites

Space only sites are not permitted to attach anything to the adjoining shell scheme. Exhibitors taking space only sites backing onto, surrounded by or adjoining shell scheme sites; should not assume that panels facing their stand will be finished. **Index** are not contracted to supply finished panels (i.e. covered with material) to these sites. Space only exhibitors booking stands between shell scheme sites must deduct 55mm from overall measurements to fit within the allotted space (eg. a 3m x 2m space only site would in fact have a floor dimension of 2945mm x 1945mm).

Failure to note this will mean that your stand may not fit in the allotted site.
